Oakland Climate Action Coalition

Petition for Local, Community-Based Global Warming Solutions

The Oakland Climate Action Coalition is a cross-sector coalition of community-based organizations, environmental experts and advocates, labor unions, and green businesses working for an equitable and just Oakland Energy and Climate Action Plan (ECAP). We support the City of Oakland's commitment to take action on climate change. We have generated a list of policies that can achieve significant carbon reductions while building a vibrant local economy and improving the quality of life for all Oakland residents -- especially low-income communities and communities of color most impacted by global warming.

The Goals of the Oakland Climate Action Coalition Policies are to:

Clean Up Air Pollution Create Local Green-Collar Jobs Save Residents Money Improve Public Health

Achieving these goals and adopting the policies associated with them will position Oakland as a model city that is addressing climate change in an economically vibrant, environmentally sound, and socially just way. **We invite Oakland residents and workers to sign this petition to join our local efforts and support our policy recommendations to ensure an equitable and just ECAP plan for the City of Oakland.**
